future

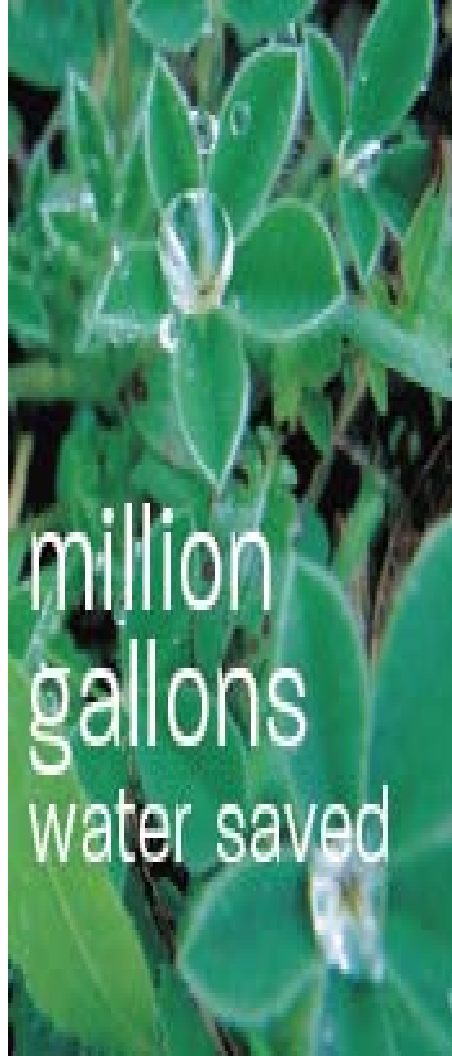

## **Growing Better Together**

One of AMD's primary values, respect for people, is embodied in our employees and extends to our customers, partners, the environment, and the communities where we operate around the world. An integral part of the Austin community since 1979, we live here, we work here, and our children go to school here. That's why, when we set out to create a state-of-the-art campus to bring together local employees from several different sites, we went above and beyond.

The AMD Lone Star Campus in Oak Hill is a result of those efforts. Through collaboration with local community leaders, experts, and stakeholders, we have created a progressive model of sustainable development — one that will help Austin remain a world-class technology hub, contribute to our region's economic future while respecting our environment, and ultimately contribute to the long-term well-being of this community.
